

DAY 4 – BUILDING DYNAMIC FRONTEND COMPONENTS

Objective

: On Day 4, I will focus on designing and developing dynamic frontend components to display marketplace data fetched from Sanity CMS or APIs. This step emphasizes modular, reusable component design and real-world practices for building scalable and responsive web applications. Key Learning Outcomes

- : 1. Build dynamic frontend components to display data from Sanity CMS or APIs.
- 2. Implement reusable and modular components.
- 3. Understand and apply state management techniques.
- 4. Learn the importance of responsive design and UX/UI best practices.
- 5. Prepare for real-world client projects by replicating professional workflows

. Key Components to Build:

- 1. Product Listing Component: Render product data dynamically in a grid layout.

Include fields like

- o Product Name

- o Price

- o Image

- o Stock Status

Example layout: cards displaying product details.

- 2. Product Detail Component: Create individual product detail pages using dynamic routing in Next.js. Include detailed fields such as

- o Product Description

- o Price o Available Sizes or Colors

- 3. Category Component: Display categories dynamically fetched from the data source.
